

Guidelines for STRAWBERRIES

After Fumigation: Apply *Soil Solution* @ 32 Oz/acre through the drip line ten days after fumigation.

Transplanted Seedlings: Apply *PercPlus* @ 16 Oz/acre or equivalent in transplant (setter) water.

2 to 3 Weeks after Transplant: Foliar apply *CropKarb* @ 24 Oz/acre in enough water volume for ample coverage. **Option:** *PercPlus* @ 16 Oz/acre and *Potassium Plus* @ 8 Oz/acre may be substituted for the *CropKarb* in this application. This application may be repeated on 5 to 7 day intervals if necessary due to excessive environmental stress.

Spring Foliar: After initial green up, begin foliar applications on a weekly schedule with a combination of *CropKarb* @ 16 Oz/acre, *Calcium Plus* @ 8 Oz/acre and *MicroVite* @ 8 Oz/acre (or *Magnesium Plus* @ 4 Oz/acre)
Optional: *PercPlus* @ 8 Oz/acre, *Potassium Plus* @ 8 Oz/acre may be substituted for the *CropKarb* in this application.

****Micronutrients:** Increase *MicroVite* rate to 32 Oz/acre in this tank-mix for added Mg, Cu, Mn & Zn.

Spring Fertilizer Applications: Supplemental nutrient sources for soil application through Drip, if available.
Soluble 20-20-20 at 20 #'s/acre, once per month, followed seven days later with
Calcium Nitrate at 20 #'s/acre, applied once per month, one week after 20-20-20.

Initial Ripening: Add *Copper Plus* @ 2 Oz/acre to the Weekly **Spring Foliar** combination listed above if no *MicroVite* has been applied.

60% Bloom: If *CropKarb* is not being used in the Weekly **Spring Foliar** combination above, add *Boron Plus* @ 2 Oz/acre to the Spring Foliar Application for two weekly applications.

Important Mixing Instructions: Add 50% of the total water volume to the tank **BEFORE** the addition of any products. **Mixing Order:** *CropKarb* or *Potassium Plus*, then *PercPlus*, *Magnesium Plus*, *Boron Plus*, *Copper Plus*. Next, add fungicides and/or insecticides. Follow with *Calcium Plus* and then spreader-sticker if desired.

NOTE: *CropKarb* may be replaced with a tank-mix of *Potassium Plus* @ 32 Oz, *PercPlus* @ 8 to 16 Oz, and *Boron Plus* @ 4 Oz. *Plant Power* may be substituted for *PercPlus* and vice-versa in any application and at the same rate.

Mixing: Always dilute *Potassium Plus* in water first, and follow with other ingredients in listed order to avoid excessive foaming.

These *DeltAg* Guidelines have been utilized to improve overall crop health and are not intended to be utilized as a replacement for basic and customary fertilizer applications. **“Other Crop Specific Guidelines are available upon request.”**
