FOLIAR NUTRIENT COMBO

GUARANTEED ANALYSIS 8-0-18

| | |
|----------------------------|--------|
| Total Nitrogen (N) | 8.00% |
| 8.00% Urea Nitrogen | |
| Soluble Potash (K2O) | 18.00% |
| Boron (B) | 0.375% |

Derived from Urea, Boric Acid & Potassium Carbonate
Weight per gallon: 11.04 lb at 68° F
Grams per liter: 1325 g at 20° C

GENERAL INFORMATION:

CropKarb is a formulation of nutrients and **DeltAg** proprietary chemistry. **CropKarb** may be applied on all field, row, vegetable, fruit, tree, vine, ornamental, turf, hay and pasture crops.

APPLICATION RATES:

Foliar: 32 Oz/acre. Apply during heavy blooming, sizing or bulking weekly as needed.

In-Furrow: Not Recommended.

Drip Irrigation: 0.50 Oz/1,000 sq ft weekly.

Injection (1:100): 4 Oz/gallon weekly (312 ppm).

Pump-Up Sprayer: 4 Oz/gallon of water.
Spray light mist over foliage from 3 feet away. Apply weekly as needed.

CAUTION: This product contains boron in amounts which could be excessive for some crops. Contact your local agricultural authority for more information on specific crops.

COMPATIBILITY: This product is compatible with most commonly used pesticides. However, it is advisable to always check for compatibility.

NOTE: Always follow label directions and precautionary statements on pesticide label.

*For More Information Please Contact **DeltAg**.

CropKarb®

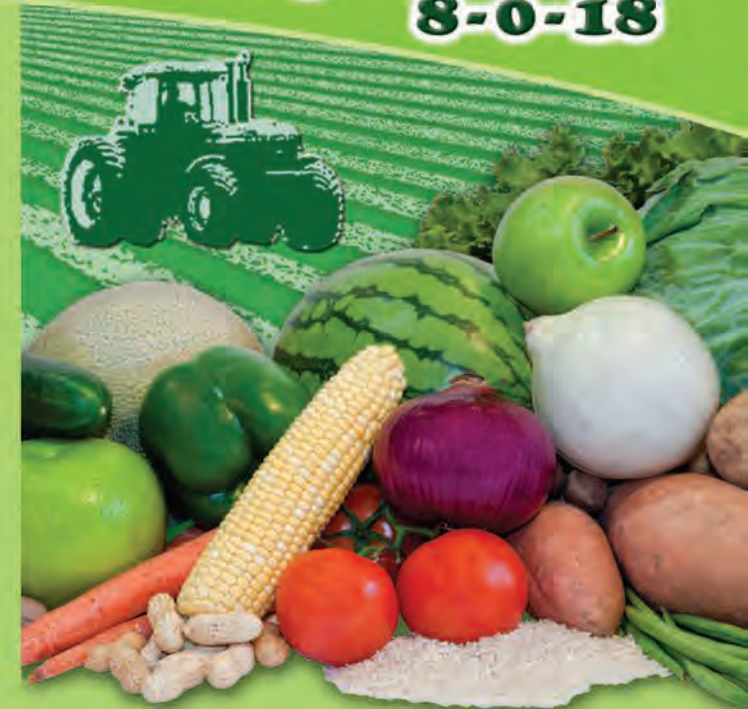

JUST THE RIGHT NUTRIENT COMBO

CropKarb at 32 ounces per acre REPLACES a 44 ounce Tank Mix of 3 **DeltAg** products that have been proven and used for years on many Mid to Late Season crops. **DeltAg CropKarb** has been formulated and thoroughly field tested since 2002 with great success.

CropKarb is designed to be applied at a low application rate as it compares to other nutrient sources. **CropKarb** supplements plants with much needed nutrients during fruit set, sizing and bulking stages of crop development.

CROPKARB RATE

Foliar Application: Broadcast: Apply 32 ounces per acre during heavy blooming, sizing or bulking. NOTE: Multiple applications should be 7 to 10 days apart. Often applied with fungicide.

APPLY DURING HEAVY BLOOMING, FRUITING AND SIZING

Chemistry... Not Fertilizer!

Why CropKarb?

At **DeltAg**, we have, for the past 20 years, recommended a standard Tank Mix during heavy fruiting and/or sizing on many crops. This Tank Mix requires three premier **DeltAg** products:

Potassium Plus @ 32 Oz

PercPlus @ 8 Oz

Boron Plus @ 4 Oz

This product combination has been proven with great success for many years on rice, cotton, soybeans, wheat, corn, vegetables and others.

THE PROBLEM: TOO MANY JUGS AND RATES

THE SOLUTION: CROPKARB

DeltAg formulated **CropKarb** as a replacement for this combination but at a lower overall application rate of 32 Oz/acre. This allows for the same great results with less confusion, less mixing and fewer jugs.

Combines

Potassium Plus - Boron Plus - PercPlus

CropKarb is a blend of urea nitrogen, potassium, and boron.

Function: **CropKarb** is designed to be applied during bloom set, fruit sizing, and bulking. **CropKarb** works by delivering key nutrients as well as a supplemental mobile carbon source to the fruiting portion of your crop. **CropKarb** is often applied with fungicides on many crops.
